Docket #98N-1038 FDA
5630 Fishers Lane, Rm. 1061
Rockville, MD 20852

Subject: Labeling of Irradiated Foods

This is a strong request that all irradiated foods be conspicuously and prominently labeled as such. Products made with irradiated ingredients should be labeled as such. Irradiated bulk produce should be identified with prominent signs on their bins. All irradiation labeling should be permanent, just like other consumer labeling.

We require the same information that international labeling standards provide, that is, all irradiated foods must be labeled as irradiated.

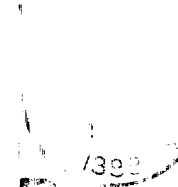

Sincerely,

C. R. Riley
